CONTRAINDICATIONS

- Bacterial or fungal infections. We must refuse service. We will do our best to accommodate you with another service.
- If you have anything other regular polish, soak-off gel polish, shellac or vinylux we cannot remove it. Many gel polishes require a drill, in which estheticians are not able to use under the scope of practice.
- Diabetes. For pedicures specifically.

PRECARE NAILCARE TREATMENT INSTRUCTIONS

- Do not shave or exfoliate 24 hours before the treatment.
- We can provide pedicure slippers, however if you have your own open toed shoes, they are more than likely safer to walk in, especially in the winter and wet months.
